Preface

This document describes the configuration of Version 1.04.02 and the delta changes since the release of Version 1.04.01 of Interim Release One (Ir1). This attachment reflects updates to software released as of July 12, 1996. It is not a formal deliverable and does not require Government approval. However, it has been placed under configuration control by the ECS CCB. Changes to this document shall be made by document change notice (DCN) or by complete revision.

Any questions regarding distribution should be addressed to:

Data Management Office
The ECS Project Office
Hughes Information Technology Systems
1616 McCormick Dr.
Upper Marlboro, MD 20774-5372

Abstract

This document describes the delivery contents of Ir1 (also referred to as *the product*) components including Commercial Off-The-Shelf (COTS) hardware and software (*Ir1 COTS*), Version 1.00 of custom Ir1 ECS software (*Ir1 Software*) and accompanying documentation.

The purpose of this document is to describe the contents of the Ir1 delivery. It briefly describes the capabilities of the product, provides an inventory of the delivery, lists unresolved problems, and addresses issues such as special operating instructions, system limitations, and disclaimer notices for public domain software used in the product.

This document describes the configuration of Version 1.04.02 and the delta changes since the release of Version 1.04.01 of Interim Release One (Ir1). This attachment reflects updates to software released as of July 12, 1996.

Keywords: version, description, release, software, Ir1, hardware, deliver, CCB, problems, instructions, TRMM, SSI&T, inventory

5.2 Ir1 Non-Conformance Reports (Closed Status)

NCRs closed as of July 11, 1996

Problem Id: ECSed02243

Severity: 2

Title: Security Patches Required on all Suns

Problem: Recent intrusion attacks here at LaRC have heighten our awareness on just how vulnerable we are to such attacks. With the development and wide dissemination of such intrusion tools as SATAN and ISS we can no longer assume that the odds are against our system being picked out of the millions on the Internet. Talking with Mr. Park, the local NASA Security Officer, I found out that NASA owned IP addresses are published among the hacker community and are routinely scanned by the aforementioned tools. Request that the Sun Solaris 2.4 Recommended Patch Cluster be installed on all Sun workstations. This Patch Cluster contains the following security patches:

Patch #	Software	Issue
102066-09	SunOS 5.4:	sendmail patch
102070-01	SunOS 5.4:	Bugfix for rpcbind/portmapper
102218-03	SunOS 5.4:	libbsm fixes

Resolution: Install Patch Cluster on all Sun workstations.

Appendix F. Archive Tapes

The following magnetic tape is used to archive the delivered baseline configuration of the developed software.
